RATUL SAHA ROY

Full Stack Developer

Phone: +8801795908863, Email: ratulroy8863@gmail.com, Address: Sylhet, Sylhet Division, Bangladesh
LinkedIn | GitHub | Portfolio | Codeforces

OBJECTIVE

Full Stack Developer experienced with React, Node.js, Express.js, and MongoDB. Capable of building end-to-end features, REST APIs, and secure authentication systems. Focused on delivering clean, maintainable code and scalable solutions. Eager to grow in a dynamic environment and contribute to impactful projects.

SKILLS

Frontend: JavaScript (ES6+), React.js, Next.js (Basic), Tailwind CSS, HTML5, CSS3, Firebase Auth, Responsive Design, Redux (Familiar), Framer Motion, Recharts.
Backend: Node.js, Express.js, MongoDB, MySQL, JWT Authentication, REST API Development, Nodemailer (Basic).
Programming Languages: JavaScript, C, C++, Java (OOP).
Tools: Git & GitHub, VS Code, Firebase, Vercel, Postman, Figma.
Soft Skills: Problem Solving, Teamwork, Public Speaking, Leadership, Debating, Time Management, Adaptability.

PROJECTS

Hostel Meals - Hostel Meal & Food Review Management Platform Live, Client Code, Server Code
Overview: A web app that streamlines hostel food management through a secure role-based system, allowing users to explore meals and subscribe to premium plans, while admins efficiently manage meal content, users, and payments.

- Built a scalable, role-based system, enabling secure access and dynamic UI for each user type
- Integrated real-time payment system for premium membership plans (Silver/Gold/Platinum) with dynamic badge rendering and access control.
- Designed advanced dashboards with paginated analytics on orders, payments, and reviews — delivering a true SaaS-level management experience. Admins can add/edit/delete meals with image uploads, assign roles, manage subscriptions, review moderation, and change order statuses — all with real-time updates and server-side search.

Tech Stack: React.js, React Router, Tailwind CSS, Firebase Auth, Express.js, MongoDB, JWT, Stripe, React Hook Form

HobbyHub – Group Management Web App Live, Client Code, Server Code
Overview: A community-driven web app where people can discover, join, or create local hobby-based groups (e.g., Fishing, Photography, Running) and connect with like-minded individuals.

- Explore a variety of local hobby groups filtered by category, popularity, or date.
- Create and manage their groups around specific interests or activities and interact through group events, descriptions, and real-time updates
- Access personalized dashboards with stats, group activity, and member insights

Tech Stack: React.js, React Router, Tailwind CSS, Firebase Auth, Node.js, Express.js, MongoDB

Product Recommendation System – Interactive Review Platform Live, Client Code , Server Code
Overview: A full-featured platform where users can share, explore, and interact with product-related queries and recommendations, with full control over their content and real-time social engagement.

- Create, update, or delete their own product-related queries with tags and context
- Explore other users' queries and get tailored product recommendations
- Add personalized recommendations and see others' suggestions
- View a **real-time activity feed** showing likes, shares, and recommendation activity across the platform

Tech Stack: React.js, React Router, Tailwind CSS, Firebase Auth, Express.js, MongoDB, JWT, Framer Motion

EDUCATION & CERTIFICATIONS

B.Sc. in Computer Science & Engineering
Metropolitan University, Sylhet — July 2023 – Present *(Expected Graduation: 2027)*

Complete Web Development Course — Programming Hero (Certificate)
Awarded Blackbelt in Web Development — Programming Hero (Poster)
